THE X-FILES: SUPER SOLDIERS

When alien abductees suddenly reappear, the agents uncover a 50-year-old government genetics program designed to breed Super Soldiers who are virtually unstoppable. Fearing her pregnancy is part of the same program, Scully searches for supporting evidence even as the country's population is being secretly primed to breed a whole generation of these lethal fighters. Then Mulder is put on trial for murdering one of these bioengineered soldiers. Now, after nine years, Mulder finally gets the chance to reveal the truth by calling on a group of witnesses who have all encountered firsthand the government's conspiracy, and seen proof of the existence of extraterrestrial life.

AGENTS FOX MULDER and DANA SCULLY

Over the many years of investigating the X-Files, Agent Fox Mulder has sought and found answers about his sister's disappearance and about the ongoing alien conspiracy to colonize Earth. Mulder remains driven to expose the truth, even if it may cost him his life. Agent Dana Scully, who initially approached the investigation of paranormal phenomenon with a skeptic's eye, has now come to believe in the existence of alien life. After her deep desire to be a mother is finally realized, Scully finds she must make the ultimate sacrifice for her child's sake. Ultimately, Mulder and Scully learn a truth that "they already know" — their trust in each other.
